Draw the network:

(Use = for large pipes,
- for small pipes,
x for container positions)

Check main rules

(Refer to full competition rules if necessary)

- Main supply connected at point 1.
- Containers connected to the network at the correct points.
- No more than the allowed number of empty lines.
- No dead-end pipes.
- All pipes connected to each other at junctions.
- Containers connected to the network using the container connectors.
- No interference between opening and closing of the main valve.

Penalty points score

Container position	Volume (ml)	Penalty points
Total:
